

Fine Sphere

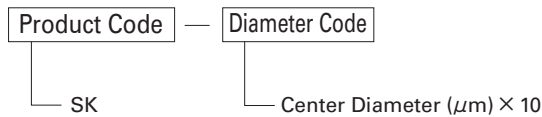

Fine Spheres can be used as gap spacers in LCDs.

Features

- Very precise diameter distribution
- Chemical and thermal stability and very few impurities
- Provides stable gaps with high hardness and very small deformation under compression load.

Part No.

Example : SK-42

4.2 μm

Diameter Range

2.0-8.0 μm

* Please contact us for details.

Standard Deviation (example)

Part No.	SK-42	
Center Diameter	μm	4.2
Standard Deviation	μm	0.07

Properties

SiO ₂	99.9% min	
Density	$\times 10^3 \text{kg/m}^3$	2.2
Material Structure	Amorphous
