

ITO超薄玻璃卷

Ultra-thin Glass Roll with ITO Coating

超薄玻璃G-Leaf™适用于卷对卷式溅镀过程。G-Leaf™具备极佳特性(耐热性),促使高效能(低电阻、高穿透率)及多用途的可挠式ITO玻璃得以问世。

Our ultra-thin glass G-Leaf™ can be applied to the Roll-to-Roll sputtering coating process. G-Leaf™ has superior characteristics such as high heat-resistant, which make it possible to produce high performance ITO coated flexible glass. This ITO coated glass has great quality such as low resistivity and high transmittance, and it is applicable variously.
