

NEG ARG FIBRE

Continuous Roving

AR2500H-200/S

AR2500H-200 roving is made of glass fibre, which contains more than 16% of ZrO_2 . AR2500H-200 is made by gathering 200 filaments into a strand, then winding 32 strands to form a cylindrical package.

AR2500H-200 is specially developed roving for highly durable GRC. It shows excellent chopping characteristics during spray-up process. Because of rather high integrity of strands the cut strands of AR2500H-200 Roving can also be used in premixed process.

■ Product Specifications

Type of Glass ——— Alkali Resistant glass
Tex (g/1000m)* ——— 2500 +/- 250
Moisture content (%)* ——— less than 0.5
Tensile strength (N/tex) ——— more than 0.245

*Data measured by JIS (Japanese Industrial Standard)

■ Process

Spray-up, centrifugal casting, premix

■ Applications

Glass fibre reinforced concrete (GRC)

■ GRC Products Using NEG ARG Fibre AR2500H-200 Include:

For Architecture

Exterior and interior panels, window frame, ceiling panel, roofing tile, composite panel, balcony element, screen panel, coping, permanent formwork, etc.

For Civil Engineering

Noise barrier, pipe, cable trough, water trough, drain pipe, bridge deck formwork, etc.

For Other Application

Garden furniture, fence, storage tank, etc.

■ Packaging Data

Ball Dimensions

Inside diameter (d) — approx. 85 mm

Outside diameter (D) — approx. 275 mm

Height (h) — approx. 270 mm

Ball nominal weight — 20.0 kg

■ Palletizing Data

Number of packages/pallet	48
Number of layers	3
Number of packages/layer	16
Pallet Dimensions (mm)	
Length (L)	1130
Width (W)	1130
Height (H)	920

■ Storage Conditions

AR2500H-200 should be stored in an upright position in a dry area in its original packaging.
AR2500H-200 should be sheltered from the direct sunlight.
