

DATA SHEET

E-Glass Roving for Long Fiber Thermoplastic Compounds ER2400 T-423N

Product Description

ER2400 T-423N is single-end roving specifically designed for long fiber thermoplastic compounds and is designed to reinforce a wide range of Polyamide (PA6, PA66, PPA))

Product Features

- Excellent process characteristics because of lower fuzz generation
- Higher mechanical strength because of excellent compatibility with Polyamide and its modified system.

Product Specification

Characteristics	Unit	ER2400 T-423N
Tex Count	tex	2400±240
Monofilament Diameter	μm	17.0 ± 1.0
Monofilament Number per Strand	fil/st	4000
Moisture Content	%	Max. 0.10
Loss on Ignition	%	0.45±0.15

Packaging

48 rolls on pallet
