

Glass Sleeves for Low Temperature Sealing

LG-16 has long been used in encapsulation of thermistors. NLT-600 is Pb-free glass and environment friendly. The acid resistance level of NLT-600 is equivalent to that of Pb glass and LG-16. We can supply not only round type glass tubes but also square type glass tubes. Square glass tubes can be mounted securely without shifting or falling.

Features

- Low sealing temperatures
- Good acid resistance in plating process
- Excellent electrical characteristics
