

E-Glass SMC Roving for bathroom equipment ER4800 S-626

Product Description

ER4800 S-626, SMC roving is especially designed for bathroom equipment utilizing unsaturated polyester resin systems.

Product Features

- Excellent process characteristics because of lower fuzz generation.
- Fast and good wet out in polyester resin systems.
- Excellent static electricity control and dispersibility. - Excellent boiling resistance.

Product Design

Characteristics	Unit	ER4800 S-626
Roving liner mass	tex	4800±335
Strand linear density	tex	Approx.88
End count	num	Approx.55
Loss on Ignition	%	1.00±0.20
Moisture content	%	max. 0.20

Packaging

48 rolls on pallet
