

附光學鍍膜的晶圓形狀玻璃

Wafer-shaped Glass with Optical Coating

我們針對高品質大型玻璃，開發高性能、低瑕疵的光學鍍膜技術。

We are developing a coating process for high-performance and defect-less optical films on our high-quality large glass.

特色

Features

- 提供超大尺寸(直徑最長可達 450mm)
- 可附加各種光學鍍膜(如抗反射塗層、濾鏡、反射鏡及折射率匹配的透明導電電極)
- 適用於高品質裝置的蓋板玻璃或基板玻璃
- Available in a large size (up to 450mm in diameter)
- A large variety of optical coatings can be applied.
(e.g. Anti-Reflection coatings, filters, mirrors and Index-matched transparent conductive electrodes)
- Applicable to cover or substrate glass for quality-demanding devices
