1. Qualitative Information Regarding Consolidated Results for the First Six Months

(1) Qualitative information regarding consolidated operating results (Six months ended September 30, 2011)

A. Overview

In the global economy, the uncertain situation continued because of the deepening of the fiscal problems in Europe and other factors, such as the slowdown of the economic recovery in the U.S. and the deceleration of economic expansion in China. The economy continued to be at a standstill in Japan as well against the backdrop of stagnant personal consumption following the Great East Japan Earthquake, severe employment conditions, and electric power problems, among other factors. As a consequence, our customers made significant downward revisions in their capacity utilization rates, increasing day by day the severity of the external environment surrounding the Company.

In this environment, even though our business performance in the first quarter (from April 1, 2011 to June 30, 2011) showed signs of recovery by exceeding the results for the previous quarter (from January 1, 2011 to March 31, 2011), the business environment worsened again coming into the second quarter (from July 1, 2011 to September 30, 2011). The Company's business performance lost momentum, with sales in areas such as our mainstay field of glass for flat panel displays (FPDs) falling short of initial targets, among other factors. As a result, the Company's performance for the first six months showed decreases both in sales and profit compared to the same period of the previous fiscal year.

(Net sales)

Glass for electronic and information devices:

Although sales of glass for FPDs recovered slightly in the first quarter, they decelerated in the second quarter as a result of the impact of production adjustments by our customers. Sales of glass related to optical products decreased in the second quarter, despite a firm performance because of communications infrastructure demand in emerging countries. Despite showing signs of recovery from the latter half of the first quarter, sales of cover glass for image sensors lacked strength because of sluggishness in the recovery of demand for digital cameras. Sales of substrate glass for solar batteries, of which the Company commenced full-scale deliveries in spring 2011, were favorable.

Glass for others:

In sales of glass fiber for auto parts, a mainstay product, the overseas market made up for a decline in the domestic market caused by the Great East Japan Earthquake, and the Company was able to secure sales in excess of last year's through the expansion of sales in a portion for which capacity was increased. However, there was weakness in terms of production and sales in some fields of business areas such as heat resistant glass, building materials and others.

(Profits)

In addition to factors such as sluggishness in sales volumes and falling prices for glass for FPDs, and cost increases coupled with a decrease in production due to factors such as the implementation of improvement work on facilities, some fields in other business areas showed worsened production and sales, putting downward pressure on profits. An increase in depreciation and amortization costs and a rise in the cost of raw materials and fuels, on top of the abovementioned factors, resulted in significantly lower profits than the same period of the previous fiscal year.

(2) Qualitative information regarding consolidated earnings forecasts

(Billions of yen)

	Nine months ended December 31, 2010	Nine months ending December 31, 2011	Change (%)
Net sales	299.8	267.0 – 277.0	(11) – (8)
Operating income	98.5	57.5 – 62.5	(42) – (37)
Ordinary income	96.3	53.5 – 58.5	(44) – (39)
Net income	58.4	28.5 – 31.5	(51) – (46)

Note: Amounts less than 100 million yen are omitted.

In the third quarter (October 1 to December 31, 2011), the current severe business environment is expected to continue, and as a result the Company forecasts that it will be difficult to expect a full-scale recovery in demand in many product fields in the foreseeable future.

Amid such conditions, the Company aims for progress in the thinning of glass for FPDs to become a source of sales that underpins sales in glass for electronic and information devices. In glass for others, the Company expects a recovery in domestic demand for glass fiber, despite softened overseas demand. Although the Company forecasts that sluggish conditions in other fields such as housing and construction will continue, the Company will focus on development of the market. Regarding expenses, increases are expected in various expenses such as raw material and fuel costs and depreciation and amortization costs, and in addition to these factors, there are concerns that foreign exchange movements and the implementation of capacity adjustments for inventory reductions, among other factors, will have an unfavorable impact on profits. Even so, the Company will push ahead with expense reductions and production improvements.

The consolidated earnings forecasts for the first nine months, which take into account the results for the first six months and the outlook presented above, predict that the consolidated earnings results will be lower when compared year on year, as presented in the table above.

Because conditions both in Japan and overseas surrounding the Company have been changing dramatically and at an extremely fast pace, it is difficult to accurately forecast future earnings. For

this reason, the Company discloses consolidated earnings forecasts for the nine months ending December 31, 2011 in the form of a range. If the various factors turn out more favorable than the Company expected (plan at the beginning of the fiscal year), earnings results are expected to be close to the higher limit of the range; conversely, if the various factors deteriorate, then the earnings results are expected to be close to the lower limit of the range.

(Concerning Disclosure of Earnings Forecasts)

In addition to the disclosure of information according to the standards for timely disclosure stipulated by the stock exchanges, the Company provides earnings forecast information as described in the table below, aiming to deliver earlier and more appropriate earnings information to investors.

Disclosure schedule	Earnings forecast for current reporting period (cumulative basis) (disclosure of numerical figures)
Late June	Three months
Late September	Six months
Late December	Nine months
Late March	Full year

Note: The outlook for the next reporting period (three-month basis) will be disclosed with the quarterly financial results report, which is disclosed at the time the quarterly earnings results are announced.

The forward-looking statements, including earnings forecasts, contained in these materials are based on certain assumptions deemed to be reasonable by the Company and include risks and contingencies. Actual business results may differ substantially due to a number of factors. Factors that may impact actual business results include the economic conditions of global markets, various rules and regulations such as those concerning trade, significant fluctuation of supply and demand of products in principal markets as well as the financial situation showing extensive changes in prices on capital markets and extensive changes in exchange rates between the yen and other major currencies such as the U.S. dollar and the Euro, interest rates and rapid technological advancement. Factors not mentioned here also could have a significant impact on business results.
