* Indication regarding execution of quarterly review procedures

At the time of disclosure of this quarterly financial results report, the quarterly review procedures for the quarterly consolidated financial statements in accordance with the Financial Instruments and Exchange Act were incomplete.

* Proper use of earnings forecasts, and other special directions

The forward-looking statements, including earnings forecasts, contained in these materials are based on certain assumptions deemed to be reasonable by the Company and its subsidiaries (“the Company Group”) and include risks and contingencies. Actual business results may differ substantially due to a number of factors. For more details, please refer to the section of “(2) Information regarding consolidated earnings forecasts and other forward-looking statements in Qualitative Information Regarding Consolidated Results for the Three Months” on page 5.

Qualitative Information Regarding Consolidated Results for the Three Months

(1) Information regarding operating results (Three months ended March 31, 2016)

A. Overview

In the global economy, although there were concerns over geopolitical risks, the economy continued to recover gradually in Europe. The US economy remained on a recovery track on the back of solid employment conditions and personal consumption. However, there were further signs of a slowdown in the Chinese economy as exports and fixed asset investments declined. Although personal consumption appeared weak, the Japanese economy continued to make a modest recovery, due in part to improved employment conditions.

In this environment, on the sales side in the first quarter (from January 1 to March 31, 2016), while sales of glass fiber and glass for optical devices were robust despite the effects of the strong yen, sales of substrate glass for liquid crystal displays (LCDs) were weak. As a result, sales fell below levels in the first quarter of the previous year (January 1 to March 31, 2015). On the profit/loss side, profits exceeded the previous year due to progress in improving productivity and cutting costs.

B. Operating results

	Three months ended March 31, 2015	Three months ended March 31, 2016	Change (%)
Net sales	61.0	57.9	(5)
Operating income	4.5	5.1	13
Ordinary income	2.2	2.4	7
Profit attributable to owners of parent	(0.5)	0.6	-

Note: Amounts less than 100 million yen are omitted.

(Sales by products)

Reporting segment	Category	Three months ended March 31, 2015		Three months ended March 31, 2016		Change	
		billions of yen	(%)	billions of yen	(%)	billions of yen	(%)
Glass Business	Electronics and Information Technology	40.9	67	35.3	61	(5.5)	(14)
	Performance Materials and Others	20.1	33	22.6	39	2.4	12
Total		61.0	100	57.9	100	(3.0)	(5)

Note: 1. Amounts less than 100 million yen are omitted.

2. Beginning in the first quarter of this consolidated fiscal period, the categories of the reporting segments for sales by product were changed from “Glass for Electronic and Information Devices” to “Electronics and Information Technology” and from “Glass for Others” to “Performance Materials and Others”.

(Net sales)

Electronics and Information Technology:

With the LCD panel market slowing, sales of substrate glass for LCDs decreased as a result of the impact of key customers’ operational adjustments. Moreover, cover glass for mobile devices (specialty glass for chemical strengthening) was affected by seasonal fluctuations and sluggish growth in the market, and as a result, sales declined. In glass for electronic devices, sales of cover glass for image sensors were stable. In addition, sales of newly developed products also increased. Sales of glass for optical devices remained strong on the back of growing demand for

communications infrastructure. Substrate glass for solar cells was generally firm.

Performance Materials and Others:

Sales of glass fiber remained solid, particularly applications in high-function plastics for auto parts. In the area of building materials, heat-resistant glass and others, sales of glass for building materials declined, particularly overseas sales. Sales of heat-resistant glass and glass for pharmaceutical and medical use were weak due to year-end inventory adjustments by major customers.

(Profit/loss)

Operating income improved year-on-year due to enhanced productivity and minimal facility repairs, despite a decline in sales, lower product prices, and costs associated with the launch of Electric Glass (Xiamen) Co., Ltd. However, ordinary income was pulled down by foreign exchange losses attributable to exchange rate fluctuations affecting foreign currency-denominated loans taken out by some overseas subsidiaries, while net income was pushed down by the reversal of deferred tax assets following the FY2016 tax reform (lowering of income and other tax rates).

(Billions of yen)

	Year ending December 31, 2016		Change (B – A)	Change (%)
	Previous forecast (A)	Revised forecast (B)		
Net sales	256.0	248.0	(8.0)	(3)
Operating income	22.0	19.0	(3.0)	(14)
Ordinary income	20.0	14.0	(6.0)	(30)
Profit attributable to owners of parent	16.0	10.0	(6.0)	(38)

Note: Amounts less than 100 million yen are omitted.

The outlook for the global economy is increasingly unclear, given the economic slowdown in China, US monetary policies, and crude oil prices, among other factors. However, we expect the Japanese economy to continue recovering gradually as various policies take effect, although consideration must be given to the impact of the earthquake in Kumamoto, global economic trends, and volatility in the foreign exchange market.

Given this environment, in the Electronics and Information Technology segment, we expect the shipment of substrate glass for LCDs to fall short of estimates made at the start of the year as the current slowdown in the LCD panel market worsens. At the same time, glass for optical devices is expected to be solid due to demand for information infrastructure in emerging economies. In glass for electronic devices, we anticipate a recovery in demand ahead of the year-end shopping season and expanded sales of newly developed products.

In the Performance Materials and Others segment, we expect shipments of glass fiber to remain at high levels on the back of solid demand for applications in high-function plastics for auto parts. Glass for building materials, heat-resistant glass, and glass for pharmaceutical and medical use got

off to a lackluster start as a result of inventory adjustments in related markets, but we are working to expand sales, particularly in overseas markets.

On the profit/loss side, we expect profit/loss to be affected by future market and product price trends, fluctuations in exchange rates, and repairs to facilities, but we will endeavor to ensure profits by improving productivity and cutting costs.

In light of the above outlook, we have revised the Company Group's consolidated earnings forecasts for the second quarter ending June 30, 2016 and the full year ending December 31, 2016, as shown in the table above.

The forward-looking statements, including earnings forecasts, contained in these materials are based on certain assumptions deemed to be reasonable by the Company Group and include risks and contingencies. Actual business results may differ substantially due to a number of factors. Factors that may impact actual business results include the economic conditions of global markets, various rules and regulations such as those concerning trade, significant fluctuation of supply and demand of products in principal markets as well as the financial situation showing extensive changes in prices on capital markets, exchange rates, and interest rates, in addition to rapid technological advancement. Factors not mentioned here also could have a significant impact on business results.
