(Proper use of earnings forecasts)

The forward-looking statements, including earnings forecasts, contained in these materials are based on certain assumptions deemed to be reasonable by the Company and its subsidiaries (“the Company Group”) and include risks and contingencies. Actual business results may differ substantially due to a number of factors. For more details, please refer to the section of “(2) Information regarding consolidated earnings forecasts and other forward-looking statements in Qualitative Information Regarding Consolidated Results for the Nine Months” on page 6.

## Qualitative Information Regarding Consolidated Results for the Nine Months

### (1) Information regarding operating results (Nine months ended September 30, 2020)

#### A. Overview

The outlook for the global economy remains uncertain as the trade dispute between the US and China and the spread of the novel coronavirus disease (COVID-19) (hereinafter called COVID-19) continue to affect economic activity, despite showing some signs of recovery. Meanwhile, in the domestic economy, although there were signs of improvement in the employment environment, personal consumption, etc., they were only moderate. In this environment, while taking initiatives to prevent infection, the Company Group has continued business activities.

For the nine months of the fiscal year (from January 1 to September 30, 2020), net sales fell below the levels in the same period of the previous fiscal year (from January 1 to September 30, 2019) despite shipments of glass for flat panel displays (FPDs) significantly increasing due to strong demand in the display market upon entering the third quarter (from July 1 to September 30, 2020), in addition to demand for glass fiber recovering, mainly in automobile-related markets, and shipments increasing after hitting a bottom in the second quarter of the fiscal year (from April 1 to June 30, 2020).

In terms of profit/loss, though the decline in net sales and falls in capacity utilization rates in the glass fiber caused profit to be pushed down, we were able to secure operating profit at the same level as in the same period of the previous fiscal year by improving productivity, mainly for glass for FPDs, reducing costs, reviewing construction, etc. Ordinary profit rose from the same period of the previous fiscal year due to a decrease of foreign exchange losses attributable to revaluation of receivables and payables related to loans for overseas subsidiaries. Profit attributable to owners of parent rose significantly from the same period of the previous fiscal year mainly due to an increase of the reversal of provision for special repairs and a decrease of the amount of loss on accident.

Note: Amounts less than 100 million yen are omitted.

(Net sales)

Electronics and Information Technology:

Shipments of glass for FPDs increased from the same period of the previous fiscal year due to demand recovering significantly in the display market for televisions and IT-related applications upon entering the third quarter, despite the impact of reduced production by customers in the second quarter. The prices declined compared to the same period of the previous fiscal year. Shipments of cover glass (glass for chemical strengthening) declined compared to the same period of the previous fiscal year as a result of the slow recovery of demand for smartphones, etc. Despite shipments of glass for electronic devices, mainly for use in auto parts, declining, shipments of glass for optical devices increased compared to the same period of the fiscal year. The LTCC (low temperature co-fired ceramics) joint venture business also contributed to sales.

Performance Materials and Others:

Shipments of glass fiber declined compared to the same period of the previous fiscal year, despite shipments recovering, mainly for high-performance resin used in auto parts, from the third quarter after hitting a bottom in the second quarter due to the impact of COVID-19. Shipments of glass tubing for pharmaceutical and medical use increased compared to the same period of the previous fiscal year, due to strong demand in overseas markets. Shipments of heat-resistant glass and glass for building materials declined compared to the same period of the previous fiscal year due to the impact of COVID-19.

(Profit/loss)

Though the decline in net sales and falls in capacity utilization rates in the glass fiber caused profit to be pushed down, we were able to secure operating profit at the same level as in the same period of the previous fiscal year by improving productivity, mainly for glass for FPDs, reducing costs, reviewing construction, etc. Ordinary profit rose from the same period of the previous fiscal year due to a decrease of foreign exchange losses attributable to revaluation of receivables and payables related to loans for overseas subsidiaries. Profit attributable to owners of parent rose significantly from the same period of the previous fiscal year because of an increase of reversals due to the reversal of provision for special repairs resulting from the cancellation of plans to repair some glass melting furnaces, a decrease of the amount of loss on accident overseas, etc.

**(2) Information regarding consolidated earnings forecasts and other forward-looking statements  
(Consolidated earnings forecasts for the year ending December 31, 2020)**

(Billions of yen)

	Year ending December 31, 2020 (From January 1, 2020 to December 31, 2020)		Change (B – A)	Percent change (%)
	Previous forecasts (A)	Revised forecasts (B)		
Net sales	230.0	235.0	5.0	2
Operating profit	12.0	15.0	3.0	25
Ordinary profit	11.0	15.0	4.0	36
Profit attributable to owners of parent	9.0	14.0	5.0	56

Note: Amounts less than 100 million yen are omitted.

Although there continues to be no sign of when COVID-19 will come to an end, the economy is expected to remain on a path of recovery due to various countries resuming economic activities.

In the Electronics and Information Technology segment, shipments of glass for FPDs are predicted to continue to be stable. In cover glass (glass for chemical strengthening), we will aim to expand applications and launch new products for mobile devices. We expect that glass for optical and electronic devices will recover in line with demand trends.

In the Performance Materials and Others segment, demand for glass fiber, mainly for use in auto parts, is predicted to recover gradually. In glass tubing for pharmaceutical and medical use, we plan to strengthen production capacity in Malaysia in the fourth quarter (from October 1 to December 31, 2020) in order to satisfy strong demand. For heat-resistant glass and glass for building materials, we predict a recovery in related markets.

In terms of profit/loss, despite predicting that there will be impacts from capital investments to prepare for the future, startup costs, utilization adjustments, etc., we will secure profits by promoting the improvement of productivity and the reduction of costs. Considering the consolidated results for the first nine months of the fiscal year and the above forecasts, we will revise, as shown in the table above, the Company Group's consolidated earnings forecasts for the full year ending December 31, 2020, announced on July 30, 2020.

The forward-looking statements, including earnings forecasts, contained in these materials are based on certain assumptions deemed to be reasonable by the Company Group and include risks and contingencies. Actual business results may differ substantially due to a number of factors. Factors that may impact actual business results include the economic conditions of global markets, various rules and regulations such as those concerning trade, significant fluctuation of supply and demand of products in principal markets as well as the financial situation showing extensive changes in prices on capital markets, exchange rates, and interest rates, in addition to rapid technological advancement. Factors not mentioned here also could have a significant impact on business results.
